

VELFED100 Hirsch Velocity Software

Security Management System for Federal, Defense, and Aerospace

VELFED100 is for end-users deploying systems with less than 100 sites.

Velocity Certificate Checking Services

This licensed module adds authentication support for PIV/PIV-I/CAC/TWIC high assurance credentials. The Velocity Certificate Checking Service (VCCS) validation engine is used for managing credential certificates and utilizing PKI to establish a chain of trust. With the use of the TS FICAM card readers and VCCS, VELFED100 is a GSA APL approved 13.02 solution.

Latest Software Upgrade

Hirsch Velocity 3.8 is the latest iteration of Identiv's world-class physical access software platform. Designed and built from the ground up, Velocity delivers unsurpassed security, interoperability, and greater expansion and flexibility options designed to accommodate the evolution of security technology and meet the needs of even the most complex business, personnel, and facility requirements. Velocity 3.8 provides full compatibility with the latest hardware in Hirsch's Mx Controller product line and supports the latest versions of Microsoft Windows and SQL Server along with the latest network encryption protocol.

Velocity Web Services Console

Allows administrators and operators to access real-time system information, enrollment, and control functionality through a compatible browser on almost any device. This provides mobility options for security and facility personnel allowing administrators and security personnel to access key features of Velocity via fixed computers and mobile devices. Velocity 3.8 builds on the Hirsch product legacy while maintaining the management environment that has received many accolades for its robust architecture, full feature set, and ease of use. The modular user interface is retained, so that users with Velocity experience will easily transition to the latest build.

Built Hirsch Tough

Building on the Hirsch product legacy, Velocity 3.8 maintains its award-winning robust architecture, full feature set, and ease of use. The modular user interface ensures that users with Velocity experience will easily transition to the latest build. For new users, the intuitive interface is supported by a comprehensive set of tutorials and help files. Performance enhancements throughout the product enable faster access to administrative views, including animated floor plans and alarm monitoring.

Velocity Federal Core Features

Administration	Contains Velocity, controllers, and interfaecs configuration tool
Alarm Viewer	Monitor and acknowledge active system alarms, such as Forced Entry, DOTL (door open too long), and many more
Graphics	Provide a visual interface for door status, alarms, and links to video feeds
Event Viewer	View system events as they occur with as much granularity as desired
Enrollment Manager	A comprehensive enrollment tool for managing individuals, groups, and their credentials
Badging Design	Design and control the issuance of credentials from within the Velocity environment
Report Manager	Choose from 75 default reports or create your own; export in wide variety of formats
Velocity Web Services Client	Access information and control systems via a web link; optimized for Edge and Chrome
Networked Global IO	Global IO manages a set of controllers that share credential zone access information and global control zone data with each other
Who's Inside	Monitor the personnel in a given building or floor; ideal for managing emergency egress/mustering
Status Viewer	Review the status of all hardware connected to a system, including doors, inputs, relays, controllers, and more
Scheduling Agent	Schedule a wide range of system tasks, like deactivating credentials, running logs, printing reports, or executing command sets
Trigger Action Manager	Pair an action to an event (i.e., associate an alarm with a video camera)
Video Integrations	Associate doors with cameras, view video with the built-in video viewer, launch from active alarm, graphics module, or the viewer

Velocity Licenses - Required for Velocity 3.8 or Later

VELFED100	Current version Velocity security management application software. Federal/Government edition: For use by customers with less than 100 sites or servers. Users (unlimited), doors (64), and client connections (10) are licensed per server. Includes all Velocity Server features like graphics/badging module, Velocity Web Console. Adds basic support for PIV/CAC/TWIC. This version is used for Government accreditation and approvals. License key enables use. For single and networked DIGI*TRAC controllers including Mx Controllers. Includes Enrollment, Photo Badging, Graphics, Alarms, Events, Control, History, Who's Inside, Programming, and Editing. E-mail Writer and Serial Writer are standard. Runs on Windows desktop OS , or Windows Server. Requires SQL Server Express (included) or Full version options SQL Server (not included). Help and Guide documentation included in software. Requires VEL-VCCS for FICAM compliance. GSA APL #10103
VELFED250	Current version Velocity security management application software. Federal/Government edition: For use by customers with between 101 - 250 sites or servers. Users (unlimited), doors (64), and client connections (10) are licensed per server. Includes all Velocity Server features like graphics/badging module, Velocity Web Console. Adds basic support for PIV/CAC/TWIC. This version is used for Government accreditation and approvals. License key enables use. For single and networked DIGI*TRAC controllers including Mx Controllers. Includes Enrollment, Photo Badging, Graphics, Alarms, Events, Control, History, Who's Inside, Programming, and Editing. E-mail Writer and Serial Writer are standard. Runs on Windows desktop OS , or Windows Server. Requires SQL Server Express (included) or Full version options SQL Server (not included). Help and Guide documentation included in Software. Requires VELFED100, VEL-VCCS for FICAM compliance. GSA APL #10103
MOD-ADD-16	Velocity security management application software, Server edition. Additional 16 Modules. Requires VELFED100.
MOD-ADD-128	Velocity security management application software, Server edition. Additional 128 Modules. Requires VELFED100.
MOD-ADD-512	Velocity security management application software, Server edition. Additional 512 Modules. Requires VELFED100.
MOD-ADD-1024	Velocity security management application software, Server edition. Additional 1024 Modules. Requires VELFED100.
CLIENT-ADD-5	Velocity security management application software, Server edition. Additional 5 Thick Clients. Requires VELFED100.
Mx-1-W	Velocity security management application software, Server edition. Add 8 Wireless Locks, counts against module license, must use Mx-1 controller. Mx-1-W license required in parallel with Mx-1. Requires VELFED100.

Velocity Certificate Checking

VEL-VCCS	Velocity Certificate Checking Service license included; service for support of PIV/CAC/TWIC certificate checking for FICAM compliance. One license required per Velocity Server version 3.6 SP2 or higher. Requires VELFED100. Identiv Global Services quote available to meet CSEIP project requirements, call sales. Requires VEL-VCCS-M starting 2nd year after purchase. GSA APL #10103
-----------------	---

Velocity Vision

SVVB	Velocity Vision Standard, Base License, Required as a Minimum for Velocity Vision Standard
AVVB	Velocity Vision Advanced, Base License, Required as a Minimum for Velocity Vision Advanced
PVVB	Velocity Vision Professional, Base License, Required as a Minimum for Velocity Vision Professional
EVVB	Velocity Vision Enterprise, Base License, Required as a Minimum for Velocity Vision Enterprise

Optional Add-Ons

Point Level Email	Trigger emails based on a specific system event/location
Active Directory/ HR Provisioning	Role-Based Access Control (RBAC) tied to identity attributes (from HR system or AD)
