

10

Reasons to Choose Primis Access Control

1 Linux Based OS:

Linux offers a greater degree of security than many operating systems and removes the requirement for frequent updates.

2 Secure & Always up to date:

Primis uses advanced AES 256 and TLS encryption technology and includes update notifications of new versions with fast in application download and install instructions.

3 Lower Cost Per Door:

The entire client architecture is 100% browser based, reducing installation, expansion, upgrades and annual maintenance costs, resulting in a substantially lower Total Cost of Ownership.

4 Open-Platform Design:

Primis provides rapid, cost-efficient integrations with a RESTful API to almost unlimited platforms.

5 Powerful Integrations:

Primis integrations to Active Directory, Velocity Vision Video Management and ASSA ABLOY WiFi Locks provide powerful solution to today's security challenges.

6 Hardware Light:

Primis uses lightweight, IoT-driven Encryption Bridges at the network edge to communicate with onsite and geo-distributed software.

7 Calendar Scheduler:

Every Primis includes the Calendar Scheduler which makes creating and managing door unlock scheduling as easy as meeting scheduling in your favorite meeting management tools.

8 Access Control as a Service:

Primis Cloud ACaaS merges subscription-based, pay-as-you-go SaaS with on-site access control devices.

9 Mobile Device Friendly:

Put the power of controlled area lockdowns in the hands of every authorized user to ensure quick response when second matter.

10 Fault Tolerance and Resiliency:

Every Primis instance includes Hot Stand By Auto Failover and Replication to ensure your security system is operational even during other systems critical failures..
