

Enterphone Mobile

Security at Your Fingertips, Mobility in Your Pocket

The highly secure mobile application brings real-time A/V capabilities to the front end, elevating visitor management and perimeter security in residential and commercial spaces.

Unlock a new dimension of access and security with Hirsch's Enterphone family, now featuring Enterphone Mobile.

From the palm of your hand to your building's entrance, we offer seamless, secure, and smart solutions for residential and business spaces.

Experience unparalleled customization, intuitive interfaces, and next-level security — all in one integrated platform.

Supported by a robust SIP server, this mobile application integrates with the optimized Enterphone system to provide real-time audio and video capabilities directly to registered mobile devices.

Whether you manage a small apartment building or a large residential complex, Enterphone scales to your needs.

Remote access lets you control and manage property access from anywhere, 24/7

Multi-language Support

- Multi-language interfaces
- Seamlessly breaks down language barriers

Future-Ready

- Regular updates and backward compatibility
- Latest mobile security and convenience features
- Supported by an open API

Features

- **Seamless Integration:** Register existing Enterphone system to SIP for mobile interaction.
- **User Flexibility:** Adaptable for residential and business needs.
- **Efficient Setup:** Quick, automated setup with QR code.
- **Mobile Accessibility:** Direct video and audio to your iOS or Android mobile device.
- **Security:** 30-day storage of door control, call history, and event recordings.
- **Video Verification:** Live video feeds for secure entry.
- **Residential Tenants:** Secure, mobile home security with Enterphone Mobile.
- **Assisted Living Facilities:** Simplified, secure access with user-friendly interface.
- **Condos and Apartments:** Advanced security accessible via smartphones.
- **Businesses and Office Buildings:** Enhanced perimeter security, compatible with card readers.

Audio and Video on the Front End

Enterphone Mobile adds audio and video to visitor management for enhanced security and ease of use.

Unmatched Security

Encrypted communications and multi-layer protocols ensure tight security with Enterphone. Adding Enterphone Mobile introduces video and audio streaming for additional secure verification.

Innovative Convenience

User-friendly interfaces, mobile app, and web-based platforms simplify security management. The mobile app allows users to authorize building access remotely, adding convenience to security interactions.

Scalable Solutions

Enterphone is adaptable for both small residences and large commercial complexes. Enterphone Mobile supports adding numerous mobile users, enabling scalable security solutions without hardware changes.
