## TAA Compliant

TAA-compliant Hirsch Management Systems are workstations and servers designed to meet the requirements of even the most demanding computing environments.

Identiv's Hirsch Management Systems (HMS) are designed to meet the needs of any site or facility that requires the most trusted and reliable computing hardware to keep its Hirsch Velocity Software security management system running at peak performance.

With various form factors and configurations available, each HMS enables end-users to meet every demand of their environments. Every HMS is optimized to leverage all the power built into Velocity, including using high-resolution, multi-layered graphics that incorporate access control, video surveillance management, and intrusion detection system (IDS) integration control into a single pane of glass view.

Identiv's HMS workstations and servers are backed by Dell® ProSupportTM with 24/7 technical support and next business day on-site support, giving you peace of mind that your system is always protected.

### Powered by Dell®

- Peace of mind knowing your system is built by one of the most trusted names in the industry

### Any Size Site

- From workstations to enterprise servers, there is an HMS system to meet your needs

### Best-in-Class Tech Support

- Three years of manufacturer-level support

- 24/7 technical support and next business day onsite

- Included with every HMS
