10 Reasons to Choose Hirsch PACS

1. Trusted History:

Hirsch has been a trusted provider of high security PACS to the U.S. federal government for 40+ years.

2. Based in the U.S.A.:

Hirsch is an Identiv brand that operates out of California and delivers the highest performance with lowest total cost of ownership.

3. Security Standards Leader:

Hirsch leads the industry in meeting evolving security standards, including HSPD-12, PIV, FICAM, and the GSA APL for 13.01 and 13.02.

4. Total Solution Stack:

Hirsch's PIV and FICAM-compliant PACS solution includes hardware, software, firmware, controllers, and readers.

5. State Department Safeguards:

Hirsch controllers handle severe power conditions with sensing power supplies, meeting State Department requirements around the globe.

6. Federal Intelligence Security:

Hirsch alarm line supervision is the most secure in the industry, meeting the requirements of U.S. federal intelligence agencies.

7. U.S. Air Force Protection:

Hirsch cabinets and controllers are bulletproof, built to withstand the harshest environments, and developed to withstand high EMF conditions.

8. Scalable for All Federal Agencies:

Hirsch PACS are highly scalable to address customers with 1000+ locations, including the IRS, DHS, USMS, and many other large federal agencies.

9. Expandable and Upgradeable:

Customers who bought Hirsch before FICAM was conceived can update to compliance with the simple, affordable addition of option boards.

10. Deepest Feature Set:

Hirsch features like secure PIN entry, lockdown, passback, occupancy counting, mantraps, entry/ exit readers for all doors on a controller, and temporary user controls are standard.
