

uTrust FIDO2 Card

FIDO2 Contact and Contactless ID Card

This simple, strong authentication experience eliminates the need for passwords.

Identiv's uTrust FIDO2 Cards allow individuals, businesses, and government agencies and contractors to replace passwords with a secure, fast, scalable, cost-effective login solution. uTrust FIDO2 Cards are FIDO Alliance certified. The cryptographic security model of the devices eliminates the risk of phishing, password theft, and replay attacks. The FIDO cryptographic keys are stored on-device and are unique for each website, meaning they cannot be used to track users across sites.

uTrust FIDO2 Cards feature near field communication (NFC) functionality for contactless sign-on to applications and can be used with a tap on a smart card reader or the back of your phone/tablet. The cards work with everyday devices, including phones, tablets, laptops, and desktops, and across all services (e.g., Gmail, Facebook, Salesforce, LinkedIn, etc.).
